

TALLER .
PROYECTOS BÁSICOS:

1.1)EMG BASIC READ

a)Ensamblamos el circuito

b) Conectamos los parches al protoboard

c) Registramos los valores en reposo

d) Registramos los valores con flexión

2)FLEX BASIC READ

a) Ensamblamos el circuito

b) Circuito ensamblado

c) Registramos los valores con el flex en posición normal

d) Registramos los valores con el flex deformado en sentido antihorario

e) Valores con el flex deformado en sentido horario

3)FRS BASIC READ

a) Circuito ensamblado

b) Valores del circuito en reposo

c) Valores del sistema con fuerza

4)IMU BASIC READ

a) Circuito ensamblado

b) Valores en circuito de reposo

c) Registro de valores en circuito de movimiento

5) TINY PROJECT EMG POSTURE CONTROL

a) Circuito en reposo con el led off / valores en reposo

b) Circuito en flexión con el led on
